Project Experience · Platforms & Commerce

DWS / MorgenFund · Investment Management Platform

Senior Frontend Architect · 10/2020 – 07/2024

Long-term development of an international investment management platform as Senior Frontend Architect.

- Implemented the migration to Azure and a continuous deployment strategy.
- Ported a React dashboard to React Native and rolled it out to additional European and Asian markets.

React, React Native, TypeScript, Azure, Continuous Deployment, and Node.js

Witt-Gruppe (Otto Group) · Multi-Brand E-Commerce Platforms

Senior Frontend Architect · 04/2019 – 09/2020

Led the frontend rebuild for the Witt Group within the Otto Group.

- Established the technical foundation for 17 multi-brand online shops across international markets.
- Built a Next.js/React frontend, an Apollo GraphQL layer, and automated test infrastructure.

Next.js, React, Apollo GraphQL, Contentful, AWS, Kubernetes, and Node.js

Project Experience · Fintech & Internationalization

DWS (Deutsche Bank) · Robo-Advisor Investment Platform

Senior Frontend Architect · 04/2016 – 03/2019

Built the WISE white-label investment platform for multiple European and Asian countries.

- Delivered from sales prototype through to a production white-label robo-advisor.
- Took ownership of a React/TypeScript component library and the complete frontend tooling stack.

React, TypeScript, Vue.js, Spring Boot, Keycloak, DocuSign, and Node.js

Regrello · AI-Powered Internationalization

Senior Technology Consultant · 10/2024 – 09/2025

Internationalized an enterprise SaaS platform using TypeScript, Go, GraphQL, and AI-assisted translation.

- Developed a GraphQL plugin system, LLM-powered translations, and encrypted Temporal workflows for six target languages.
- A one-off on-site assignment in the US demonstrates willingness to travel internationally.

Go, GraphQL, Redis, Temporal, Google Gemini, TypeScript, and Node.js

Recent Hands-on Products

Terminaro · Product by Sebastian Software GmbH · SaaS · Appointment Booking System

Product Engineer · 01/2026 – 08/2026

Multilingual appointment scheduling system with a public booking page and integrated administration.

- Implemented public booking, administration, calendar integration, email delivery, and secure deployments.
- Used React Router, TypeScript, Convex, and automated tests as an end-to-end product stack.

React Router, Convex, TypeScript, Better Auth, CalDAV, and Bunny
terminaro.eu

Palamedes · Product by Sebastian Software GmbH · Dev Tools · AI-Powered Localization Platform

Product Architect · 10/2025 – 06/2026

Developer-first platform for AI-assisted localization within Git and release workflows.

- Designed and implemented a CLI-first workflow, translation pipeline, QA reports, and terminology features.
- Delivered the website, newsletter backend, authentication, and API and pipeline infrastructure.

AI Applications, Localization, React Router, Convex, TypeScript, Lingui, and Relanto
